Projects

SENDIT - <https://senditcouriers.netlify.app/>

SendIT is a courier service that helps users deliver parcels to different destinations. SendIT provides courier quotes based on weight categories.

WordLine - <https://github.com/njugunaemilly/library-front-end>

Worldline is a library where a user can access a variety of books and can decide on what book they would like to read based on the reviews of the book.

EXPERIENCE

Creative Junk Ltd/Technical Support

2021-2022

- Designed and created impactful social media posters that helped our client gain traction and increased users by 15% and helped increase engagement by 30% across their social media accounts.
- Populated data into the system with accurate and up to date information that resulted in a significant surge in data volume and data landscape that witnessed a 15-20% improvement in decision making.
- Successfully implementing and configuring Office 365 that helped the organization improve productivity and collaboration by helping employees reduce time taken to complete tasks by approximately 1.5 hours every week and also increased the number of simultaneous collaborations on documents allowing the team to work together on projects.

Gottlich/Personal Assistant

2014

- Successfully scheduled and coordinated google and physical meetings with clients, ensuring smooth consultation processes and follow-up appointments with vendors that helped with quick and satisfactory decision making for the client.
- Facilitated seamless payment transactions using both mpesa and bank cheques between clients and suppliers, ensuring timely and accurate financial exchanges and seamless events.
- Efficiently managed calendars for employer, clients and suppliers ensuring organized and productive meetings.
